Policy Evaluation Lab

Lab 4: A case study, the PNRR Parco agrisolare

Dr. Matteo Caruso · mcaruso4@os.uniroma3.it
Roma Tre University – Department of Business Economics
November, 2026

PART 1

Italy’s recovery plan (PNRR)

The PNRR in one document

- The Council approved the assessment of Italy's **Piano Nazionale di Ripresa e Resilienza** (PNRR) with an Implementing Decision of **13 July 2021**
- That decision has been amended: this Annex, dated **20 August 2026**, belongs to an amending decision
- The Annex lists, for every reform and investment, its description, its **milestones and targets**, and the instalments to which they are linked

ESTIMATED TOTAL COST OF THE PLAN

€194,435,381,164

of which the REPowerEU chapter: €7,212,200,000

Source: Council of the EU, ST 12357/26 ADD 1, 20 August 2026 (Annex on Italy's recovery and resilience plan).

Missions and components

Mission 1

- C1: digitalisation of the public administration, justice, public administration
- C2: digitalisation, innovation and competitiveness of the production system (axis 1)
- C3: tourism and culture 4.0

Mission 2

- C1: **circular economy and sustainable agriculture**
- C2: energy transition and sustainable mobility
- C3: energy efficiency and renovation of buildings
- C4: protection of land and water resources

Mission 3

- C1: infrastructure for sustainable mobility

Mission 4

- C1: education services, from nurseries to university
- C2: from research to business

Mission 5

- C1: labour policies
- C2: social infrastructure, families, communities and third sector
- C3: special interventions for territorial cohesion

Mission 6

- C1: proximity networks, facilities and telemedicine for territorial health care
- C2: innovation, research and digitalisation of the national health service

Mission 7: REPowerEU

Source: Council of the EU, ST 12357/26 ADD 1, 20 August 2026 (Annex on Italy's recovery and resilience plan).

Paid by results: milestones, targets, instalments

- Italy receives the money in **instalments**: 10 of non-repayable support (grants) and 10 of loans
- Each instalment is linked to a list of:
  - **milestones** (*traguardi*): qualitative steps, e.g. a law entering into force
  - **targets** (*obiettivi*): quantitative indicators, with a unit, a baseline, a value to reach and a quarter
- Example, 1st grant instalment: entry into force of the primary legislation on the governance of the PNRR

Instalment	Grants (€ m)	Loans (€ m)
1st	11,494.3	12,643.7
2nd	11,494.3	12,643.7
3rd	11,494.3	9,825.3
4th	2,315.6	16,611.5
5th	3,621.5	9,030.6
6th	2,053.6	7,908.5
7th	5,294.6	15,716.0
8th	3,541.6	11,184.6
9th	7,670.1	7,118.5
10th	12,799.9	19,919.6

Amounts rounded to €0.1 million from the Annex, Section 2.

Source: Council of the EU, ST 12357/26 ADD 1, 20 August 2026 (Annex on Italy's recovery and resilience plan).

Today's measure in the plan: Parco agrisolare

Mission 2, Component 1, Investment 2.2 – Parco agrisolare: to make the agricultural sector more sustainable and competitive, by supporting investments in agricultural, livestock and agro-industrial buildings for the installation of **solar panels** and complementary interventions

Code	Type	What must be reached	By
M2C1-4	target	beneficiary projects identified, worth at least 30% of the resources assigned to the investment	Q4 2022
M2C1-5	target	at least 32%	Q4 2023
M2C1-6	target	at least 63.5%	Q2 2024
M2C1-6 bis	target	100% of the further supplementary resources	Q4 2024
M2C1-9	target	**at least 1,470,000 kW (1,470 MW)** of solar capacity installed	**Q2 2026**

The exam text (2025) gives a target of 1,383 MW: the current Annex says 1,470 MW.

Source: Council of the EU, ST 12357/26 ADD 1, 20 August 2026 (Annex on Italy's recovery and resilience plan).

A second instrument: the Parco agrisolare facility

Mission 2, Component 1, Investment 4 – Dispositivo per il parco agrisolare

- A grant scheme to encourage private investment and improve access to finance in the agricultural and agro-industrial sector
- Managed by the **GSE** (Gestore dei Servizi Energetici S.p.A.); it supports the same kind of investments: solar panels on agricultural, livestock and agro-industrial buildings
- Italy transfers **€789 million** to the GSE for the scheme; at least €633 million must contribute to climate objectives
- Milestones: implementation agreement in force (M2C1-26, Q4 2025); legal agreements with final beneficiaries for 100% of the scheme (M2C1-27, Q2 2026)

PART 2

Today’s case

So, today we are going to evaluate a case study

1. We look at a real case study
2. Form groups of **2–3 people** at most
3. Study what the question is asking, and look at the data
4. Formulate some opinions, and the approach you would use
5. Present your results

Today's lab: a case study

Italy is among the countries with the highest direct energy consumption in food production in the European Union. A significant part of the investments of the National Recovery and Resilience Plan (PNRR) is meant to support **solar photovoltaic plants** in the agricultural and agro-industrial sector, promoting sustainable energy solutions for firms.

The **"Parco agrisolare"** investment, for which a total of **€2.35 billion** of PNRR funds has been allocated, aims to reduce energy consumption by upgrading production buildings and installing photovoltaic panels on the roofs of agricultural buildings (e.g. stables), with the target of reaching an installed capacity of at least **1,383 MW by 2026**.

Table 1: Parco agrisolare by region

Region	Projects activated at 31/10/2024	Total cost of projects (€ million)	PNRR funding assigned (€ million)	Planned capacity (MW, at the end of the works)	Installed capacity (MW, completed at 31/10/2024)
Liguria	87	9.7	5.6	4.9	1.0
Lombardia	2,038	500.2	283.6	247.5	44.9
Piemonte	1,348	236.1	133.3	119.1	21.8
Valle d'Aosta	29	2.3	1.2	0.7	0.1
Emilia-Romagna	1,520	340.1	181.3	159.9	25.8
Friuli-Venezia Giulia	427	81.3	46.1	41.2	5.4
Trentino-Alto Adige	856	96.2	55.3	37.8	7.4
Veneto	1,641	295.8	175.0	152.6	23.1
Lazio	524	76.2	45.1	38.3	2.6
Marche	327	49.9	26.3	26.1	3.4
Toscana	844	118.1	66.8	51.7	5.7
Umbria	282	41.8	21.8	22.2	4.2
Abruzzo	348	51.9	31.5	26.3	4.4
Basilicata	237	36.7	23.4	18.6	1.5
Calabria	553	64.7	42.1	32.3	2.8
Campania	815	126.4	78.0	60.8	8.5
Molise	196	31.5	20.0	15.0	1.7
Puglia	1,334	171.0	111.1	82.5	10.2
Sardegna	544	70.9	41.0	28.6	1.8
Sicilia	1,135	151.1	94.0	70.3	6.4
Italy	**15,085**	**2,551.9**	**1,482.5**	**1,236.4**	**182.7**

Solar plants on agricultural and livestock buildings. Source: MEF written exam, 31 March 2025 (envelope 1, not drawn); region names re-aligned with the rows, which are misprinted in the original. The data were constructed for the exercise and do not necessarily correspond to real values.

The questions

> Based on the information provided, analyse the main evidence describing the implementation process of the investment, indicating also which indicators it would be useful to compute, and how.

> In addition, illustrate which strategy could be adopted, and which other data would be needed, to evaluate the effectiveness of the measure.
