November, 2026

PART 1

NextGenerationEU

NextGenerationEU

- The **largest ever stimulus package** undertaken in the EU
- According to the Commission, it is boosting Europe's economy and making societies stronger and more resilient
- It is "setting the blueprint for a new growth model" based on a clean, innovative and inclusive economy, and on digital and tech sovereignty

> *"NextGenerationEU: for a stronger, more resilient Europe"*

Source: European Commission, https://next-generation-eu.europa.eu/index_en (accessed 6 November 2026).

How the money flows

- The instrument is the **Recovery and Resilience Facility** (RRF), established by Regulation (EU) 2021/241
- It provides **loans and grants** to Member States
- The projects are set out in each country's **national Recovery and Resilience Plan**
- In Italian: *piano nazionale per la ripresa e la resilienza*, the PNRR

Funds allocated through the RRF	
Loans	€291 billion
Grants	€357 billion
Overall	**€648 billion**

At 2022 prices. The maximum amount foreseen by the RRF Regulation.

Source: European Commission, https://next-generation-eu.europa.eu/index_en (accessed 6 November 2026).

Where the money goes: six areas

1. The green transition
2. Digital transformation
3. Social and territorial cohesion
4. Policies for the next generation
5. Smart, sustainable and inclusive growth
6. Health and economic, social and institutional resilience

The page highlights in particular **healthcare**, **education and skills**, and **SMEs and young entrepreneurs**

Source: European Commission, https://next-generation-eu.europa.eu/index_en (accessed 6 November 2026).

Following the implementation

- Many funded initiatives have already been completed, with others still underway
- Progress of each country in implementing its plan: the **Recovery and Resilience Scoreboard** and the Commission's **27 Country Snapshots**
- An **interactive map** of projects, with a warning: it is not an exhaustive database, and the funding amounts shown are based on the **initial cost estimates** in the plans
- Projects are subject to the Commission's verification of the satisfactory fulfilment of **milestones and targets** under Regulation (EU) 2021/241

Source: European Commission, https://next-generation-eu.europa.eu/index_en (accessed 6 November 2026).

Three projects from the page

ESTONIA

A new tram line connecting Tallinn's Old Port to the city centre: **€36.5 million**

PORTUGAL

Resources and equipment against wildfires, including aerial assets for the Air Force: **€89 million**

BELGIUM

Building and renovating childcare facilities in Wallonia: **€6 million**

Today's case is one investment of Italy's plan: the *Parco agrisolare* (from the exam text)

Source: European Commission, https://next-generation-eu.europa.eu/index_en (accessed 6 November 2026).

PART 2

Today’s case

So, today we are going to evaluate a case study

1. We look at a real case study
2. Form groups of **2–3 people** at most
3. Study what the question is asking, and look at the data
4. Formulate some opinions, and the approach you would use
5. Present your results

Today's lab: a case study

Italy is among the countries with the highest direct energy consumption in food production in the European Union. A significant part of the investments of the National Recovery and Resilience Plan (PNRR) is meant to support **solar photovoltaic plants** in the agricultural and agro-industrial sector, promoting sustainable energy solutions for firms.

The **"Parco agrisolare"** investment, for which a total of **€2.35 billion** of PNRR funds has been allocated, aims to reduce energy consumption by upgrading production buildings and installing photovoltaic panels on the roofs of agricultural buildings (e.g. stables), with the target of reaching an installed capacity of at least **1,383 MW by 2026**.

Table 1: Parco agrisolare by region

Region	Projects activated at 31/10/2024	Total cost of projects (€ million)	PNRR funding assigned (€ million)	Planned capacity (MW, at the end of the works)	Installed capacity (MW, completed at 31/10/2024)
Liguria	87	9.7	5.6	4.9	1.0
Lombardia	2,038	500.2	283.6	247.5	44.9
Piemonte	1,348	236.1	133.3	119.1	21.8
Valle d'Aosta	29	2.3	1.2	0.7	0.1
Emilia-Romagna	1,520	340.1	181.3	159.9	25.8
Friuli-Venezia Giulia	427	81.3	46.1	41.2	5.4
Trentino-Alto Adige	856	96.2	55.3	37.8	7.4
Veneto	1,641	295.8	175.0	152.6	23.1
Lazio	524	76.2	45.1	38.3	2.6
Marche	327	49.9	26.3	26.1	3.4
Toscana	844	118.1	66.8	51.7	5.7
Umbria	282	41.8	21.8	22.2	4.2
Abruzzo	348	51.9	31.5	26.3	4.4
Basilicata	237	36.7	23.4	18.6	1.5
Calabria	553	64.7	42.1	32.3	2.8
Campania	815	126.4	78.0	60.8	8.5
Molise	196	31.5	20.0	15.0	1.7
Puglia	1,334	171.0	111.1	82.5	10.2
Sardegna	544	70.9	41.0	28.6	1.8
Sicilia	1,135	151.1	94.0	70.3	6.4
Italy	**15,085**	**2,551.9**	**1,482.5**	**1,236.4**	**182.7**

Solar plants on agricultural and livestock buildings. Source: MEF written exam, 31 March 2025 (envelope 1, not drawn); region names re-aligned with the rows, which are misprinted in the original. The data were constructed for the exercise and do not necessarily correspond to real values.

The questions

> Based on the information provided, analyse the main evidence describing the implementation process of the investment, indicating also which indicators it would be useful to compute, and how.

> In addition, illustrate which strategy could be adopted, and which other data would be needed, to evaluate the effectiveness of the measure.
